Are You Choosing the Right Signature Pad?

Before deciding which Topaz signature pad is the right fit for you,

Does your software support Topaz signature capture devices?

If so, select an option from **1** **2** **3** and **4** to determine which pad is right for you

1 LCD or Standard?

LCD
Signature is displayed on the pad, increasing signature quality

Standard
"Like writing on paper with invisible ink."
No signature display, cost-effective solution

SigLite Slim 1x5

Meets legal requirements for electronic signature

Optional
LED backlight provides improved visibility

SigGem Color 5.7

2 Lite or Gem?

Lite
Pressure required to create signature

Lite models are less rugged than Gem, with a 2-year warranty

SigLite 1.5 LCD

Gem
Minimal pressure required to create signature

Gem models are more rugged, with a 3-year warranty

3 Which Connection Port?

B	Serial Port	Serial connection to host computer
HSB	USB HID Port	USB connection to host computer, HID communication protocol
BSB	USB COM Port	USB connection to host computer, Virtual COM protocol
BHSB	Dual Port	USB & serial connections to host computer

Serial interface cable sold separately

Overwhelmed by connection ports? Give us a call, we can help! 800-830-9523

4 What Size Surface? (inches)

1x5
Provides adequate space for signature capture

4x3 & up
Larger LCD surface allows for more space to present text to a signing party

SignatureGem LCD 4x3
