

The Zebra TC8000

The TC8000 is a revolutionary redesign in mobile computer technology and form factor. Just one look at this device and you will see the out-of-the-box thinking Zebra put into this, all with workplace optimization in mind.

The TC8000 is unlike anything else on the market!

**ALL TOUCH
TERMINAL
EMULATION
SCREEN**

Graphic-based, all touch screen

Use a touch screen with no coding, modifications, or redesigns required! You can also create custom keyboards to fit the individual needs of your application.

WEIGHT

33% lighter than traditional devices!

Reduces worker fatigue and increases productivity.

**HOT
SWAP
BATT-
ERY**

TC8000 will stay turned on for a short time while you replace the battery

Largest battery in its class. No need to wait for the device to shut down and reboot. Workers have around 30 seconds to 'hot swap' a battery & preserve their session.

**ERGO-
NOMICS**

Larger, forward facing screen

This eliminates the need to tilt the device to verify scans and edit data. Lessen worker fatigue and increase productivity.

**PRODU-
CTIVITY**

Increase in productivity

14% increase in productivity. It's 100% possible!
