What is OSCR360?

Not a Total Station, not a laser scanner, not a measuring device, & priced to fit your budget, OSCR360 is a unique investigative tool used to capture crime or crash scene evidence as seen by the investigator. OSCR360 equipment was created from your voice by collaborating with Investigators, Officers and Attorneys. Bring the facts of the scene to life with OSCR360.
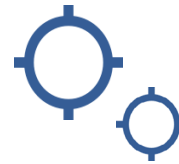

360° view				
Set up & capture entire crime or crash scene 360 degree photos in under 20 minutes.	Instantly view 360 photos on the OSCR tablet.	Securely sync your photos to the OSCR360 desktop app.	Build the case. Add in supporting multi-media evidence files.	Connect the dots. Present a visual walk-through of the timeline and the facts. Everyone sees the same view.

User Feedback

OSCR360 was used as a key component in the successful prosecution of two homicide cases.

"[OSCR]360 was used in the prosecution of Jonathan Ortiz for Murder in the Second Degree. It was used during the testimony of a main witness in the case [in the courtroom.] We were able to have the witness walk through the crime scene with the use of the 360. The jury was able to see the witness's vantage point of the events that occurred. The witness was able to articulate where all of the parties involved in the crime were located through the use of the 360. We were pleased with the results since it helped us explain the crime scene to the jury."

Julie M. Hahn, Esq.;
Assistant District Attorney;
**Chief, Major Felony Bureau**
Monroe County, NY

"OSCR360 is a gift to crash reconstruction. It typically takes an average of 45 minutes to take still photos of a crash scene. With OSCR360, I was able to capture everything I needed in 30 seconds. This equipment easily allows us to document a collision in a clear and concise manner & shows a true and accurate depiction of the crash and the environment."

Sgt. Charles Grasso, Crash Re-constructionist, CT

"I thought [OSCR360] helped consolidate all the information we had to consider and make things clearer. We wish we could have taken it to the deliberation room..."

Rideout Murder Trial Juror

OSCR360

MADE IN THE USA

Capture, preserve and present a more comprehensive and accurate representation of a crime or crash scene.

Built from your voice:

Simple and Easy to Set Up & Use
No training required. No post production required. Easily create & present the crime or crash scene walkthrough with OSCR360.

Prevent Scene Trampling & Contamination
Quickly capture crash or crime scene photos and show command staff instantly on the OSCR tablet.

Improve Efficiency
Quickly complete your evidence collection. Capture an entire house or scene in under 20 minutes. No post production required.

Keep Ancillary Evidence in one Container
Incorporate multi-media evidence files into your presentation with the desktop app and preserve it forever.

Improve Officer & Community Safety
Quickly reopen roads after crashes. Reduce time officers are at dangerous scenes.

Purpose-Built & Priced for any size Municipality or Prosecuting Attorney
OSCR360 is made in the USA and is priced to fit your budget.

Show the facts, close the case, justice is served.
