

HOW CAN OSCR360 KEEP OFFICERS SAFE DURING COVID-19?

*Keep your Officers safe during the COVID-19 crisis.
Limit the number of personnel entering a scene.*

OSCR360 partners with you on all scenes, including domestic violence, unattended deaths, assaults, burglaries, homicides, and more.

01

GET IN AND GET OUT capture overall scene photos quickly

Reduce Officers' exposure to COVID-19 and other biological threats. Use the OSCR360 kit to capture a scene in 5 seconds or an entire house in 15 minutes.

LIMIT NUMBERS OF OFFICERS ON SCENE

One Officer operates the OSCR360 system. Once 360s are captured, take the OSCR tablet to command staff. Safely & instantly view your 360 photos. Limit Officers' exposure to biological hazards, including COVID-19.

02

03

LIMIT USE OF PPE

Personal protective equipment is hard to come by. With limited Officers on scene, agencies save valuable gloves, masks, and gowns for others.

DECON IS EASY with the add-on OSCR360 Rain Kit

The OSCR Rain Kit protects your 360 camera. Easily wipe down the protective housing. The OSCR360 Rain Kit is used by Officers during biological and chemical threats including MRSA scenes, meth lab search warrant execution, wet and dripping fire scenes, hazardous waste/dumping investigations, and more.

04

05

DOMESTIC VIOLENCE CASES ARE ON THE RISE

Limit possible COVID exposure for Officers. OSCR assists Officers by quickly and completely documenting domestic violence cases. The Violence Against Women Act (VAWA) has been used to help agencies fund OSCR360.
