OSCR360

Investigations & SWAT/Tactical

Everywhere. Every case. Every time.
Purpose-built from your voice.

OSCR360 is a two-part, multi-use system designed and built from the voice of Law Enforcement. The paired system includes software and a 360-degree spherical image capture kit. OSCR is being used to document various scenes ranging from simple municipal code violations to biological threats, to the more involved homicide scene investigations. OSCR teams with you for crime & crash investigations, fire service, emergency management planning, active shooter training, teaching forensic science curriculums, environmental safety and more.

About Us

After 20+ years working for law enforcement, we understand that you work a 24/7/365 job with virtually no margin for error. Stress levels are at a max and you are busy keeping us safe at all times.

Our job is to alleviate some of that burden by creating tools that make your job easier. It all started with the creation of our 4910LR driver's license reader for e-Citation, then continued with the addition of patrol vehicle equipment and accessories, and continues evolving to this day with our OSCR360 spherical crime and crash scene equipment. All of our equipment is built from the voice of law enforcement. L-Tron equipment is deployed in over 3,000 municipalities across all 50 states.

From roadside stops and traffic accidents to crime scene investigation and incident pre-planning, our solutions are developed from your voice.

You ask, we deliver.

Your Success is Our Purpose
