OSCR360

Your Reunification Plan Checklist ✅

#1 Agreement between school and reunification site

Make arrangements & sign an agreement with an off-site location to use for reunification during an emergency.

#2 Determine roles & responsibilities

Predetermine & assign your staff to designated roles.

#3 Mark key locations

Predetermine areas for staging command post, parent check-in, waiting areas, parking, first aid, etc.

#4 Communication

Plan for concise communication with first responders, transportation & parents. Pre-planned verbiage for parent communication is helpful

#5 Signage, supplies & equipment

Prepare clear, concise signage to direct individuals as they arrive. Consider any supplies you may need including water & first-aid.
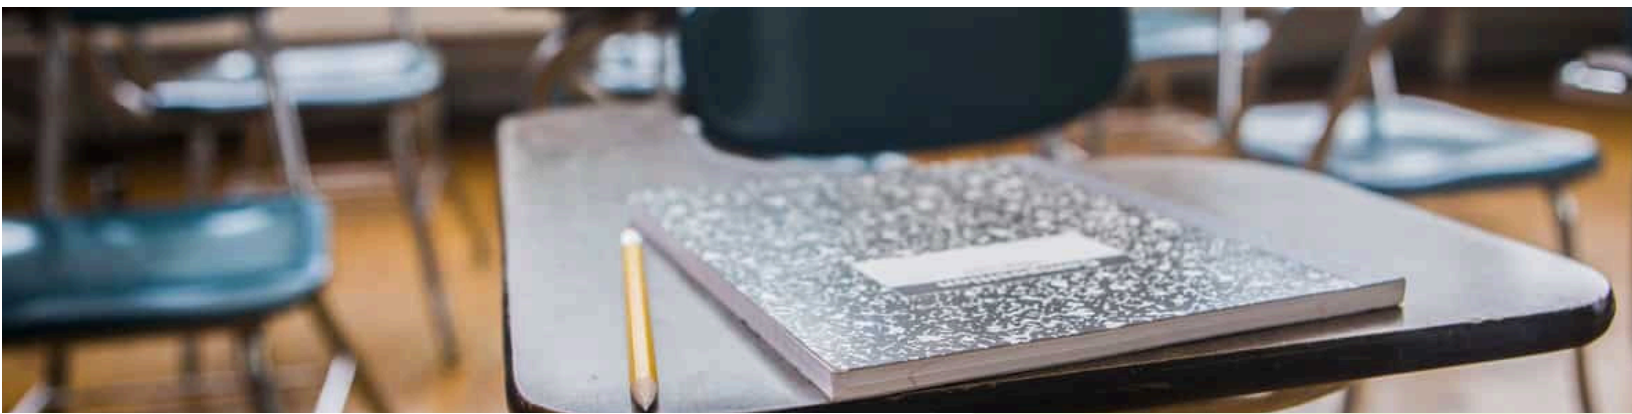

#6 Train & re-train

It is difficult to bring your entire staff to the reunification site. Hold regular, virtual trainings on reunification using OSCR360.

OSCR360

OSCR360 is a training, planning and preparation tool designed to give faculty and staff a real chance at being prepared for any emergency.

Easily train on, share and visualize emergency plans—like reunification and evacuation plans. Integrate OSCR360 imagery, mapping, and your safety documents into one powerful tool.

> "
> *My safety committee and I have been to our reunification site, but nobody else (teachers, staff, first responders), and it's really hard for people to wrap their heads around what it's actually going to be like in practice - you can't bring 150 people to your reunification site for drilling. Anything that gives them a leg up to visualize it is helpful, and OSCR360 does that.*
