

**Make Manufacturing
Safer And More Efficient With
SureMDM By 42Gears**

The manufacturing industry can be challenging to manage, as a huge number of workers and devices come together to complete time-sensitive processes. With SureMDM by 42Gears, you can stay in control of your device fleet, perform repairs remotely, keep workers focused, and thwart potential security threats.

Device Management for **All Kinds of Manufacturing,** Including:

- Finished Goods
- Raw Materials
- Equipment
- Automotive

Manage A Wide Range of **Mission-Critical Devices:**

- Rugged Devices
- Smartphones
- Tablets
- Barcode Scanner
- RFID/ NFC readers
- And More

SureMDM For Manufacturing

Central Management for Distributed Manufacturing

Areas of application

- Use the SureMDM console to remotely manage devices in every production center.
- Manage and control a variety of IoT devices from a single console.
- An intuitive central dashboard provides instant device updates at any time.

Quality Management

Areas of application

- Easily provide technical managers and quality inspectors with real-time device health metrics.
- Prevent device breakdowns by identifying and investigating devices that show signs of impending malfunctions.

Analytics-Driven Process Improvement

Areas of application

- Use data-driven insights to transform or automate your business processes.
- Collect a rich fabric of data through rugged devices, barcode scanners, and RFID/ NFC readers for informed decision-making.

Tracking & Monitoring

Areas of application

- Stay up-to-date on delivery time and shipment status by tracking device location.
- Save money by locating and retrieving lost devices.
- Improve employee productivity by monitoring and restricting device activity on-site.

Benefits

Help employees work faster and more safely by improving focus.

Use data-driven analytics to help optimize your supply chain and inventory management

Minimize downtime, maximize output and improve worker efficiency.

Inspect every device from a single console for faster and less expensive management

Keep devices and data safe at all times

Reduce IT support time and costs with remote troubleshooting.

Replace the need for multiple management systems with a single intuitive console

42Gears Customers in the Manufacturing Industry Include:

Case Study

Client -

A major distributor of millwork wooden doors and other products

The firm needed to streamline warehouse operations such as deploying and tracking devices, along with pushing the latest firmware and app updates to every device

The Solution: **SureMDM**

Using SureMDM, the company can now automatically deploy devices by scanning barcodes.

With device location tracking, IT admins can quickly find lost devices to ensure data & device security.

The firm can enforce compliance on every device, ensuring the operating system, apps, and firmware are fully up-to-date.

Benefits

Because it takes less time to get devices ready for workers, the company can begin seeing ROI faster, while freeing up IT teams to spend time on other tasks.

The IT team can now track lost devices, significantly increasing the chance they can find and retrieve a lost device.

The company became more confident in its ability to keep important data safe, and more broadly, ensure employees used devices as instructed by management.

Remote repairs resolved many issues more quickly than before, maximizing uptime and employee productivity.

About 42Gears

42Gears is a leading Unified Endpoint Management solution provider. Customers can choose between Software as a Service (SaaS) and on-premise solutions to secure, monitor and manage their business endpoints. 42Gears supports almost any endpoint, including tablets, phones, rugged devices, desktops, wearables, and more. With over **18,000 customers in 115 countries**, 42Gears solutions have a proven track record of success in almost any industry and scale.

About L-Tron

At L-Tron, we have decades of experience providing our clients with the hardware and software they need for their business operations. Our partnership with 42Gears has further expanded our ability to help with security and remote management for manufacturing, warehousing, logistics, industrial automation, healthcare, retail, and more.
